

SKILLS

Programming Languages: C++, JavaScript

Frontend: HTML, CSS, JS, React.js, UI/UX ,Framer, ThreeJs

Design: Figma, Canva

Backend: NodeJs, ExpressJs

DBMS: PostgreSQL, MongoDB

Other: Data Structures and Algorithms (DSA), Git/GitHub

EDUCATION

Pune Vidyarthi Griha , Pune B.Tech in Computer Science with Aritificial Intelligent & Data Science 2027

Relevant Coursework: Object-Oriented Programming, Operating System, Database, Machine Learning, Data Structures and Algorithms, Statistics and Probablity

FREELANCE

- VX Solution – Frontend Website Development**
Developed the complete frontend for VX Solution, ensuring a responsive, user-friendly interface and smooth navigation. Focused on modern UI/UX principles to enhance usability and overall visual appeal. [Link](#)
- Social.com – Web Application Development**
Contributed to the development of Social.com, focusing on functionality, layout structuring, and UI refinement. Implemented clean, maintainable code practices to support scalability and future enhancements. [Link](#)
- Next.js Project – UK Client (Bug Fixing & Optimization)**
Collaborated with a UK-based client to debug and optimize an existing Next.js project. Resolved frontend performance issues, fixed UI inconsistencies, and ensured cross-browser compatibility for a seamless user experience.

PROJECTS

TeleCast, Full-Stack Project Currently working [Link](#)

- Building an LMS web app for real-time audio-based learning sessions.
- Integrating Vapi for audio communication features.
- Implementing ClearAuth for secure user authentication and access control.
- Using WebSockets to enable real-time interaction between learners and instructors.

FutureGram, Web Dev June 2025 [Link](#)

- Designed and developed a responsive frontend using React.js.
- Built backend APIs with Node.js and Express for scheduling email.
- Integrated MongoDB for secure storage and retrieval of user messages.
- Implemented scheduling logic to deliver posts at a future date and time.

FinAi, Frontend Developer March 2025 [Link](#)

- Built premium, responsive frontend components using React.js with modern UI/UX.
- Implemented animations, gradients, and interactive elements for better user engagement.
- Assisted in backend integration, connecting APIs to display dynamic data.
- Collaborated on minor backend tasks, including bug fixes and data handling improvements.

ACHIEVEMENTS

- Ranked in the top 10 out of 50 teams at **COEP 2025 National Hackathon** by contributing to a competitive project with collaborative development.
- Won the **Data Analytics Workshop (Techotsav)** by excelling in quiz, presentation, and video making rounds, standing out among 50+ participants. 2025 2024
